## Compatibility of VBHN325SJ47/VBHN330SJ47 with GSE Mounting Systems (in-roof)

We acknowledge that our solar panels of the series „SJ47“ are compatible with the mounting system of GSE for in-roof installation, with the model "Plaque 1559/1046". Both portrait and landscape are accepted, as long as the long sides of the frame are supported by the mounting system and the wind load on the back side is avoided.

This system is rated for a snow load of 2400 Pa.

This approval is valid from 12.2015 and until there is a change in the specifications of either the solar panel or the mounting system.

With best regards,

Panasonic Electric Works Europe AG

Christian Comes

Manager Product Management Solar Division
